

• PROJECT 2026

Digital Corps of the Ministry of Defense

Training military personnel in technology, AI and
cybersecurity during mandatory service

MINISTRY OF DEFENSE OF THE REPUBLIC OF UZBEKISTAN

01

Training Pipeline

Three-stage system of selection and specialist training. Each stage is a filter: from mass testing to professional training of the best.

1 WEEK

Testing & Screening

Skills assessment, group assignment

3 WEEKS

Basic Cyber Warrior Course

Computer literacy or AI fundamentals

9 MONTHS

Professional Specialization

AI Engineer, Cyber Defence, UAV & FPV

02

Testing & Screening

PROCEDURE

Soldiers take online tests in groups in the computer lab on the military base

DURATION

1 week

GROUP ASSIGNMENT

No computer skills

Basic computer literacy course

Has PC skills

AI literacy course

Advanced

Mentors (ustoz-shogirt)

03

Basic Cyber Warrior Course

PROCEDURE

Distance learning via online platform in computer labs supervised by instructors

DURATION

3 weeks, every other day, 2 hours

TWO LEARNING TRACKS

FOR BEGINNERS

Computer literacy: PC, email, documents, security

FOR ADVANCED

AI literacy: data analysis, content creation, AI tools

Ustoz-Shogirt

Advanced soldiers become mentors for others. A traditional Uzbek mentorship system adapted for digital education.

KEY INSIGHT

During service every soldier gains digital skills

Computer literacy

General computer literacy: PC usage, email, documents, PC security

AI fundamentals

AI fundamentals: working with data, creating materials using AI tools

Even soldiers who don't advance to Stage 3 leave service with digital skills — contributing to the country's digitization.

04 Professional Course

9 months · every day, 3 hours · remote in computer labs

THREE SPECIALIZATIONS

239

AI Engineer

Python, ML, automation, AI tools

I44

Cyber Defence

SOC, monitoring, incident response

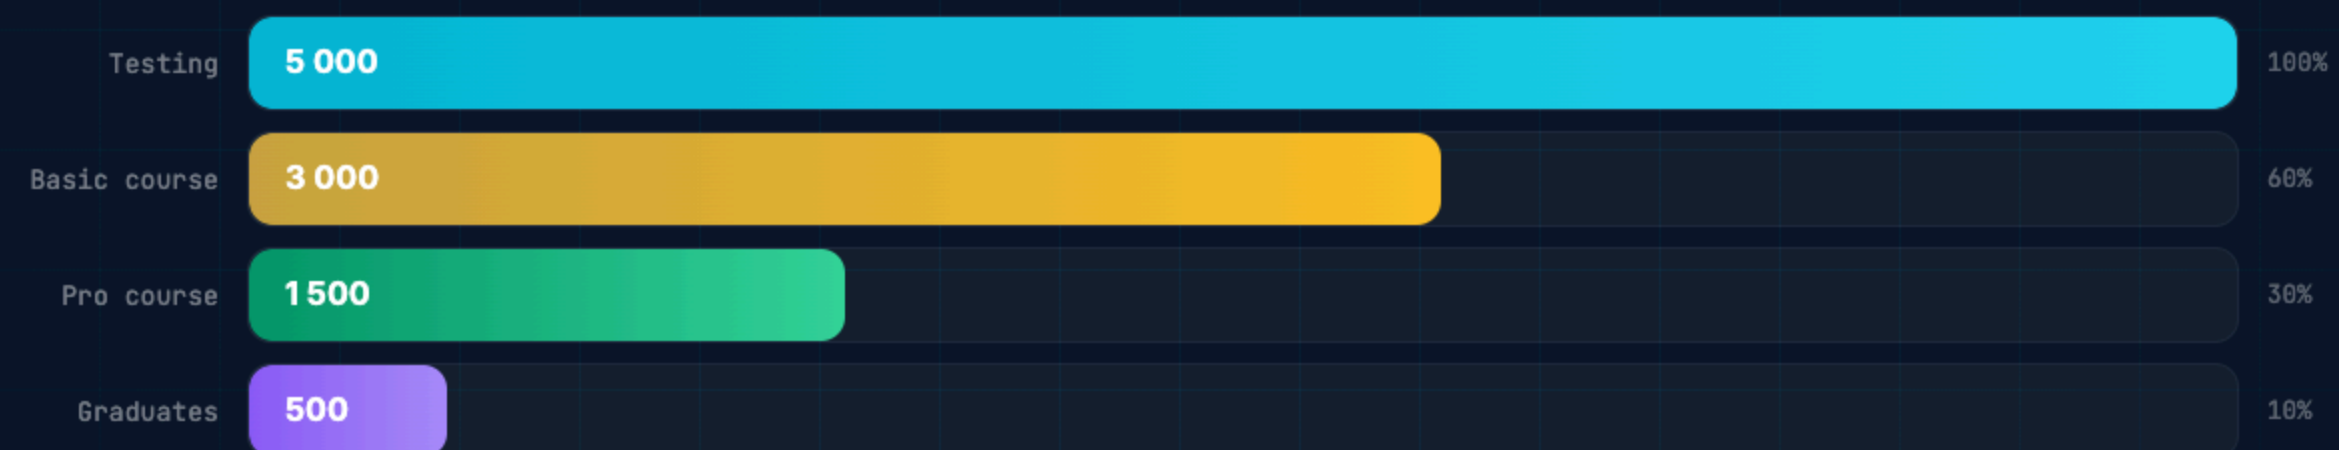

96

UAV & FPV

Drone operators, embedded, firmware

05 Results 2026-2027

Project Documentation & Working Prototype

Full documentation, teaching methodology,
learning materials and a working platform
prototype
